

ONE CLICK METAL

made with mind

LABMODULE

for more material variety

More flexibility

The Lab module enables printing with different powder materials without the need for time-consuming material changes to the overall system. In addition, small quantities of material (precious metals or other) can be processed very easily.

Growing application possibilities

The flexible use of materials and the preheatable build plate create ideal conditions for research and development, e.g. in the field of materials research or prototype development.

Easy integration

Compatibility with the **MPRINT** means that the Lab module can be installed quickly and easily.

Technical data

Building area (LxW) 78mm
x 53mm

Building height
90mm at 1,5 times dosing*

Preheatable Build plate
up to 200°C

Integrated powder supply

Removable overflow

*maximum height of 120mm depending on dosing factor.
